

High blood sugar?

Virta can lower it without medications or surgery.

Most Virta patients lose weight, lower their A1c, and reduce their diabetes medications.

60% of patients reversed their type 2 diabetes*

1.3% average reduction in HbA1c

94% of insulin users reduced or eliminated usage

Hallberg et al. Diabetes Ther. 2018; DOI:10.1007/s13300-018-0373-9

* Note that % reversal is defined as the % of patients with HbA1c less than 6.5% who are taking no glycemic control medications or only metformin.
